

WORKFLOW 2

A funder asks

Stacy answers one question by pulling three separate sources together — Renée’s school notes, the grant agreement, and Priya’s payment history — then translating them into a single response. Every mark below is sourced to something she said.

What happens

Friction — it waits, breaks, or repeats

Named, not traced yet

WHO OWNS WHAT

Renée

School performance information

Priya · Finance

Payment and financial information

Yvette · Development

Fundraising and pledge information

Stacy

Reviews it all, writes the funder response

Funder

Asks what their money did — 8 to 10 times a year, more in the fall

E26 · E45

STACY

Receives the question and identifies what she needs: **school performance, grant requirements, and payment history**. She gathers all three herself.

E27

Information is scattered across different people and systems, so she has to bring the pieces together by hand before she can answer.

E27 · E46

THREE PIECES, THREE PEOPLE

01 RENÉE

Director of School Investments — pulls school visit notes showing whether each metric is on or off track, and why. Lives in her own document, not a system.

RUNNING DOCUMENT · RENÉE KEEPS IT E28 · E29 · E30

Waits same day to two days — Renée's site visits and applications come first.

E31 · E32

02 THE GRANT AGREEMENT

Metric promised, target set. On the shared drive, in her inbox, or in development's copy.

PDF OR SIGNED DOC · SHARED DRIVE, EMAIL E33

20 minutes to half a day hunting it down — no single home for it.

E34 · E35

03 PRIYA

Pulls payment history from QuickBooks and confirms what money was actually received and coded. Clean data that knows nothing about performance.

QUICKBOOKS EXPORT · ONE ROW PER PAYMENT

E36 · seam: E08+E36

Two to three days during close week or forecast season — and she has to make sure the three sources agree with each other.

E37 · E38

Nobody owns pulling it together but Stacy — and there is no documentation, because she *is* the process.

E46 · E47

STACY, ALONE

Compares and combines the grant requirements, school performance, and payment information by hand — about an hour once she has all three.

WORD DOC OR EMAIL DRAFT

E39 · E40

From scratch every time — no template, and nowhere that performance sits next to metrics and disbursement.

E42 · E43

Writes it up — translating Renée's internal notes into a funder-ready response.

E41

Metrics renegotiated by call or email go undocumented — the current version lives in memories and inboxes.

E48 · E49

Verifies the metric — she emails the funder to confirm it before sending, because she can't otherwise tell what's current.

E50

Report goes back to the funder

E26 · E41

ELAPSED

About a week, start to finish — if nobody's on vacation. E44

NAMED, NOT TRACED YET

Public data refresh, twice a year — someone pulls it down and rebuilds the sheet. E51

E-numbers cite the interview quote each mark came from. No quote, no mark.
