

Future state • One platform

Bianca’s whiteboard, drawn as a flow. Blue is what she changed; green is what she left alone.

HOW TO READ THIS

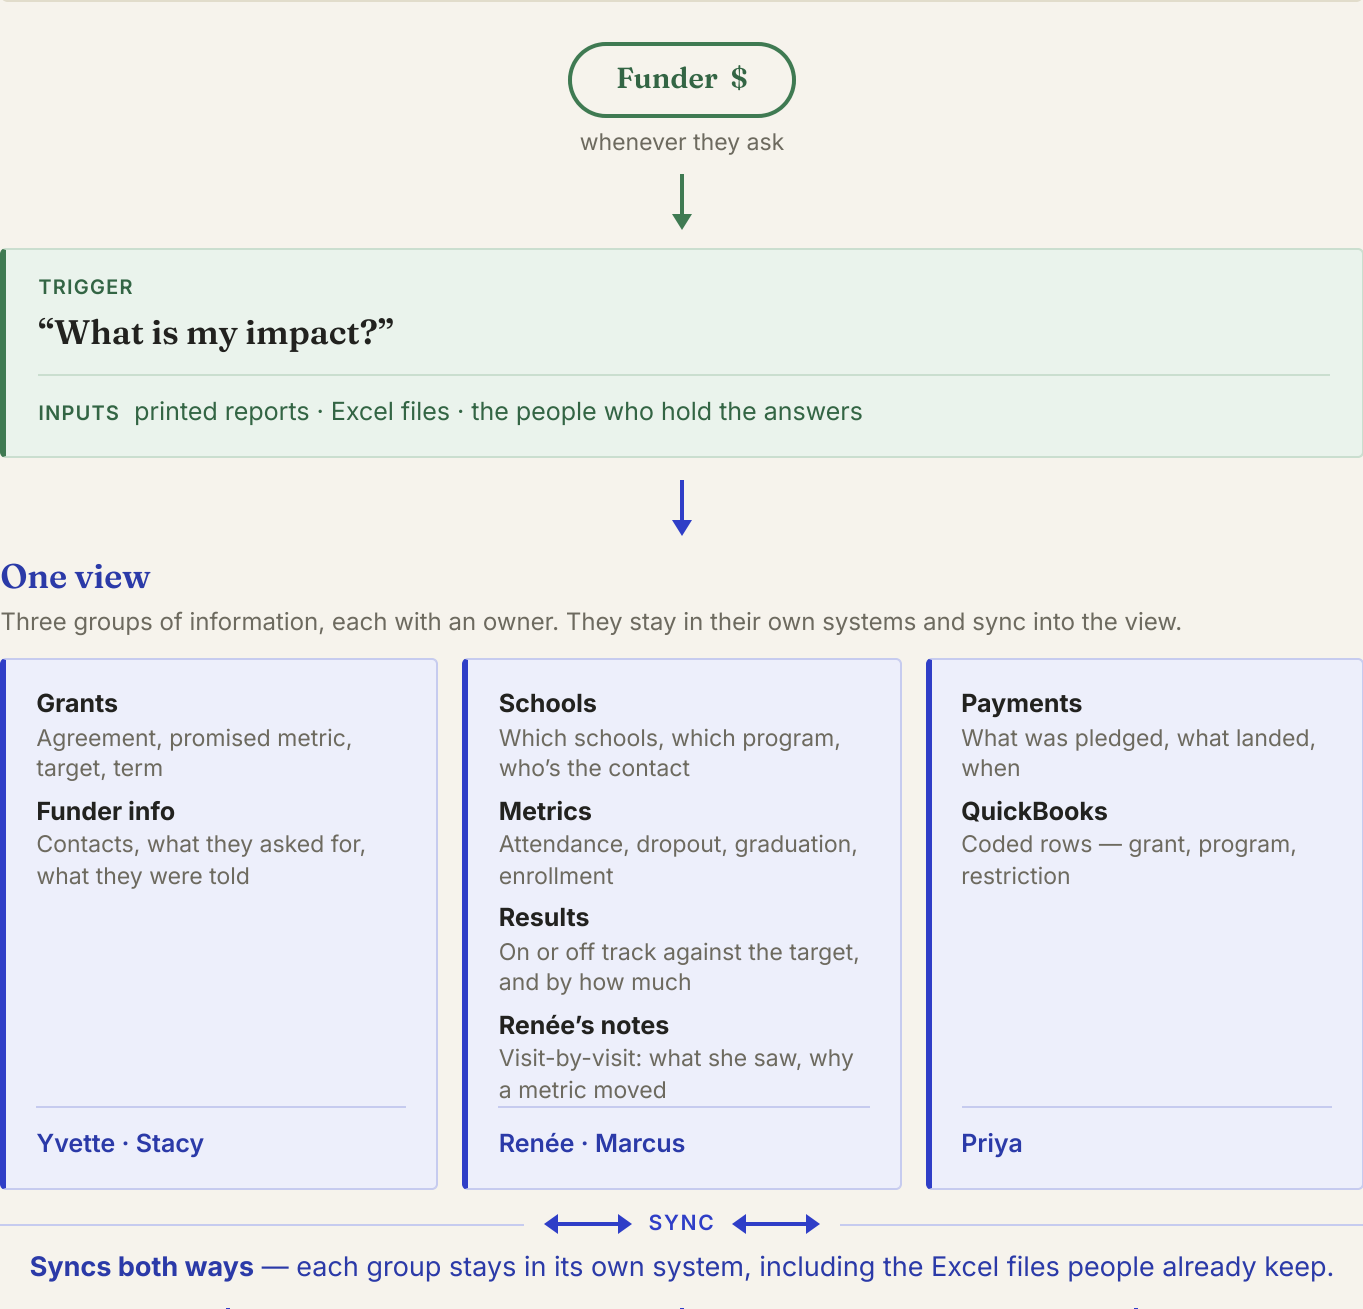

Fixed

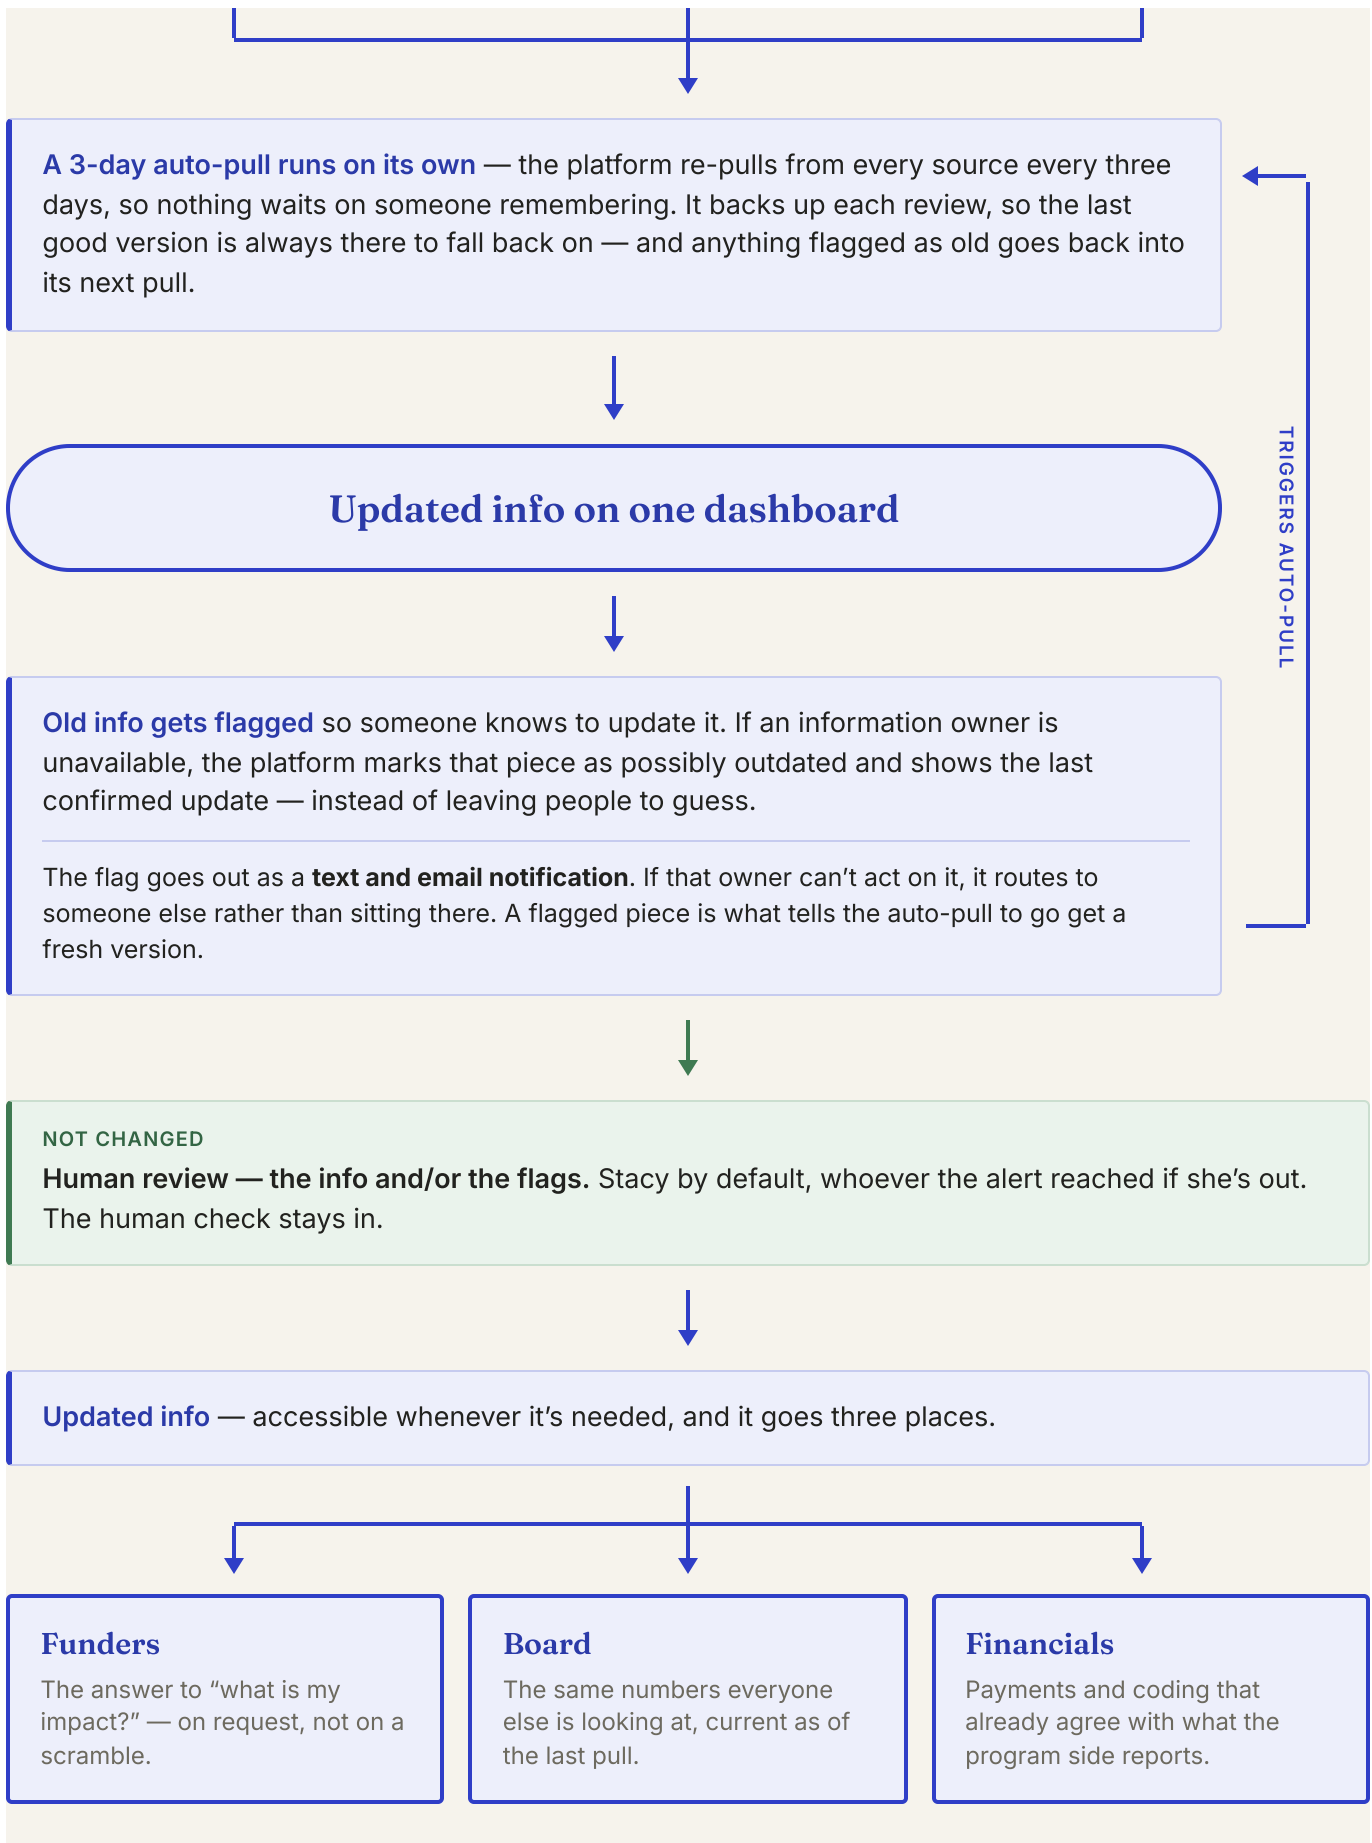

The change she drew in.

Not changed

Works today. Stays as it is.

The whole point of the blue path is the time it takes back: **One week today, about 10 minutes once the platform is connected.**

THE OUTCOME

Stacy can query the connected information, review the latest available data, and write the funder response — without chasing three people across multiple systems. **A week of gathering becomes about ten minutes of reviewing.**

Two marks on the board are hers to confirm: whether the connected view and the auto-connect are one build or two, and who owns flagging stale info once the platform can see it.
